

CIRKUIT BREAKER: A New Operating System for Human Collaboration

Decentralized Systems

CIRKUIT

BREAKER

circuitbreaker.com

Our Human Systems were Built like Machines. Now, they are Breaking Down.

Structural Failure

Rigid hierarchy suppresses creativity and scales fear instead of trust.

Human Failure

52% of workers report chronic burnout because inequality is built into the architecture.

Economic Failure

50% of new businesses fail within 5 years because they lack the 'Organic Logic' needed to adapt.

Circuit Breaker: The Operating System for the Post-Hierarchy World

- **EQUAL VALUE:**
REPLACES TOP-DOWN
PRESSURE WITH
CO-CREATIVE
POTENTIAL.

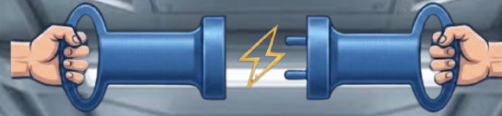

- **CONSENT-BASED
PARTICIPATION:**
CONTRIBUTION
CONTRIBUTOR-EMPOWERED
ENGAGEMENT.

Circuit Breaker

POST-HIERARCHY SOLUTIONS

- **SELF-REGULATION:**
REPLACES RIGID OVERSIGHT
WITH AUTOMATED, FAIR LOGIC.

CIRCUIT

BREAKER

circuitbreaker.com

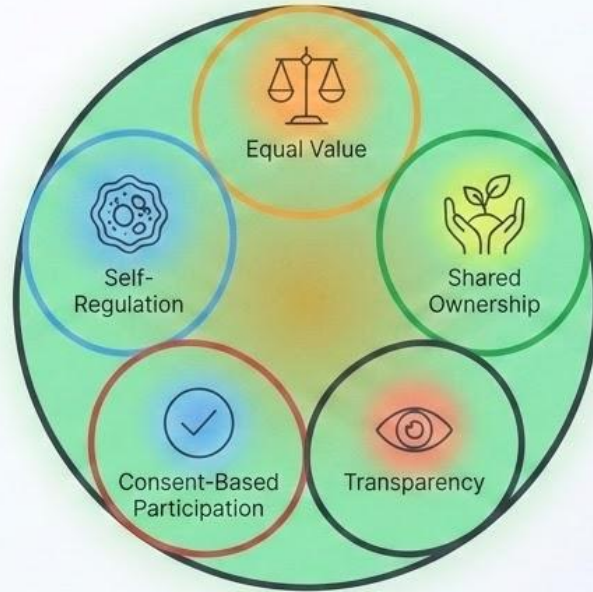

Proprietary Math: $k = \text{round} \left(\frac{k_0}{1 + \frac{k_0 - 1}{N}} \right)$

The Threshold: Administrators set a "Target Success Rate" (S) from 66% to 90%

Unanimous Alignment: The randomized bloc (k) must reach 100% consensus for a proposal to pass

We Restructure Human Collaboration Based on Nature's Own Blueprint.

A regenerative ecosystem where alignment replaces pressure,
innovation accelerates exponentially, and healing is part of the workflow.

Circuit Breaker is not a company, it's an organism.

Scaling the Grid: From Groups to Communities

The Logic

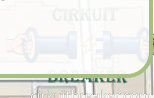

Just like a power grid, Cirkuit Breaker links individual **Groups** into a **Community Group**.

The Security

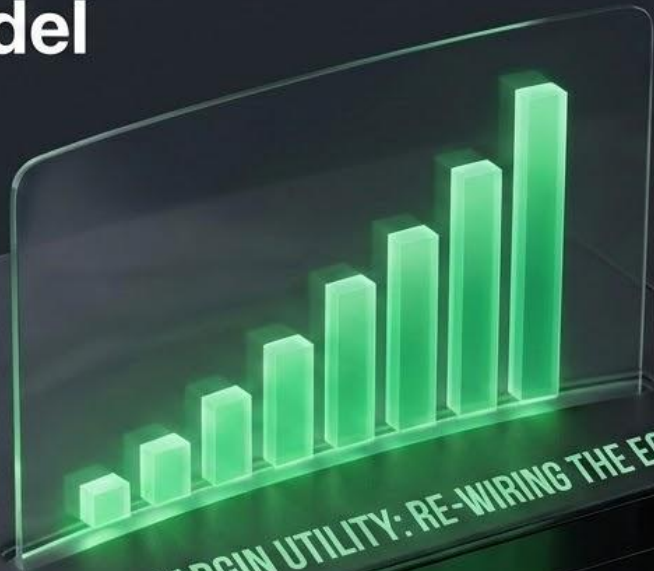

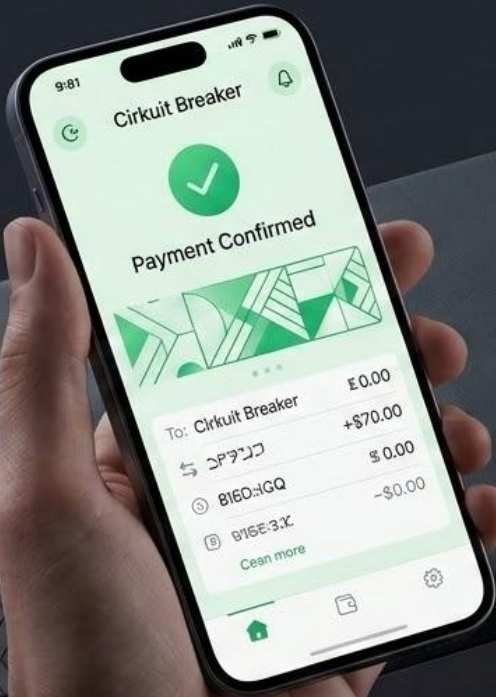

Zip-code locking ensures local decisions by local people—no "outside interference".

The Narrative

This is where the app moves from a "Company Tool" to a **Societal Operating System**.

Circuit Breaker: High-Margin Utility and Scalability Model

HIGH-MARGIN UTILITY: RE-WIRING THE ECONOMY

THE PRICE POINT:
\$1.99/mo per User.

THE LOGIC:
This is "Utility Pricing." It's low-friction for the individual but creates a massive, stable foundation for the organization.

- THE SCALABILITY:**
- **10,000 Users:** \$19.9k/month (Proof of Concept)
 - **100,000 Users:** \$199k/month (Regional Scale)
 - **1M Users:** \$1.99M/month (Global Utility)

THE 5-YEAR CIRCUIT: FROM FIELD CREWS TO A GLOBAL NERVOUS SYSTEM

YEAR 1: FOUNDATION

Beta launch with industrial crews, construction firms, and trade unions.

YEAR 2: LOCAL GRIDS

Expansion into local municipalities and zip-code locked neighborhood community groups.

YEAR 3: THE STANDARD

Integration into corporate governance, non-profits, and remote-first tech startups.

YEAR 5: GLOBAL CONNECTION

Circuit Breaker becomes the baseline Operating System for high-trust human collaboration.

The Regenerative Engine: Our Business Model

Decentralized Systems

THE REGENERATIVE ENGINE

- Software Licensing: Communities & Enterprise
- Organizational Transformation & Coaching
- Education: High-Trust Coaboration Training
- Ecosystem Innovation: Shared Economic Rights

Year 1: \$280k

Year 3: \$4.5M

Year 5: \$35M

The Ask: A \$2.5M Seed Round to Build the Foundation.

& Expansion

Investment Structure

We are offering a structured revenue participation model linked to software performance, not traditional equity. Investors gain income based on platform growth and shared rights to innovations created within the ecosystem.

> EXTERNAL OPPORTUNITY

- Mass adoption of decentralized systems.
- Perfect market timing for inclusive social innovation.
- Untapped demand for sovereign decision-making.

> THE SOVEREIGN MOAT

- Proprietary k-formula Math & Biological Architecture.
- Natural Law Alignment: Mimics organic group coherence.
- The Shared Vision Gate: No implementation without unanimous reconciliation of intent.

Anticipating and Mitigating Key Risks

|  Risk |  Mitigation |
|--|---|
|  Slow Market Adoption |  Targeted education campaigns and high-success pilot programs to prove the model |
|  Regulatory Uncertainty |  Retain expert legal counsel and design flexible contracts to maintain organizational sovereignty across jurisdictions |
|  Competition from Established Players |  Our unique biological architecture and focus on coherence is a deep-seated value proposition that is hard to replicate |
|  Financial & Cash Flow |  Diversified revenue streams and a focus on strategic partnerships to ensure stability |

Decentralized Systems
